

PENNSYLVANIA ECONOMIC REVIEW

Format Guidelines for Accepted Papers

1. Authors must submit a final electronic copy of the paper in MS Word file format.
2. The paper should be typed single-spaced in Times New Roman with point size at 10 points.
3. Equations: Default settings should be used, with Arabic numbers flush right in parenthesis.
4. All margins should be 1.7 inches.
5. Do not number the pages electronically.
6. References in the text should be parenthetical references with the author's last name and date of publication.
7. References should be listed at the end of the paper (after endnotes and appendices). This section should have a first-level heading "REFERENCES" and followed by a single line space. Entries should appear in alphabetical order by the first author's last name.

The following are some examples:

Basawa, I.V., A.K. Malik, W.P. McCormick, and R. L. Taylor. (1991) Bootstrapping unstable first autoregressive processes. Annals of Statistics 19: 1098-1101.

Bernanke, B. and M. Gertler. (1989) Agency costs, net worth and business fluctuations. American Economic Review 79: 14-31.

8. Tables and Figures should be numbered in Arabic numbers, e.g., Table 1. Please use the "Portrait" orientation. Tables and Figures should be placed at the end of your article and their appropriate placement in the text noted.
9. If you use footnotes, DO NOT use the endnote or footnote setting in Word. Use superscript numbers to refer to the notes, which should then appear at the end of the article.
10. Sections of the paper should be flush left and bolded in all capital letters with one extra line space between section head and text.
11. Subheadings should be in upper and lower case letters, flush left and italicized, with one extra line spacing above and below the subhead. For subheads below the first level subhead, indent one tab for the second subhead. Please limit subheads to no more than two.
